Troubleshooting

Apple Watch not charging.

- Apple Watch can only be charged with the official magnetic charging cable that came with the watch, it cannot be charged on any other wireless charging surface of this charger. Charging cable is not included.

Phone not charging.

- Make sure to use an 18W PD or QC3.0 adapter if charging multiple devices at once.
- The phone case or ring holder is too thick, remove it before charging.
- Rest the phone in portrait mode, not landscape mode, to align with charging coils.

Smart watch/Earbuds/Wireless device not charging.

- Make sure devices are compatible with Qi wireless charging technology.
- Make sure devices are aligned with charging coils.

Devices charging too slowly.

- Make sure to use an 18W PD or QC3.0 adapter for best charging results, especially if charging multiple devices.

Thank you for choosing this mbeat® product. Please read the instructions carefully before use. Store this manual in a safe place for future reference.

Features

- Charge up to 3 wireless devices simultaneously with a compatible PD or QC3.0 charger.
- Universally compatible with wireless charging smartphones, earbuds and Apple Watch.
- Qi certified wireless fast charge capable when using 18W PD or QC3.0 equivalent charger or above.
- Minimise clutter with tailored Apple Watch magnetic charger holder.*
- Supports Apple Watch USB-A and USB-C magnetic charging cables.

*Apple watch original magnetic charging cable not included.

For best results, please use comparable 18W USB-C PD or QC3.0 charger. If a conventional 5V/2A USB charger is used, the total wireless charging output is limited to Max. 10W. You may experience slow charging if you attempt to charge multiple devices simultaneously.
